

1.3 (U) PERISCOPE EMPLOYMENT

NWP 3-13.10

(U) The periscope provides a vital sensor capability to support any assigned mission. All submarine officers and certain enlisted attack center watchstanders must be trained in the proper use of the periscope to minimize the vulnerability of the ship when coming to and operating at periscope depth. Periscope employment procedures are summarized in this section and are discussed in detail in chapter 4. Periscope employment procedures have been extensively revised and should be studied in detail by all personnel whose duties include periscope operation.
